

# Dynamics 365 Deployment Services

Superior consulting services for a more successful Dynamics 365 product implementation.

Welcome to the UHS Logic Team. You have made a great partner choice, it's important to get your new Dynamics 365 solution successfully configured and deployed. Using Microsoft's AGILE SureStep Methodology and best deployment practices, our team of deployment specialists help make your Dynamics 365 rollout a success, enabling you to guarantee long-term advantages for your business and your IT environment. Together, we will ensure that your project outcomes are aligned with your objectives.

## Dynamics 365 Deployment Drivers

- **Get your ROI faster:** Access our accumulated product experience to accelerate your technology configuration, manage change, improve user adoption and reduce the time taken to complete your roll out by drawing on our knowledge base and best practices.
- **Optimise your operations:** It is important that you start utilising the technology you adopt quickly and efficiently to reduce the risk of service interruptions. Our experts ensure that your deployment is complete and operational at all times to deliver the value you need.
- **Maximise your investment:** When Dynamics 365 is configured to suit your businesses processes, you achieve maximal returns on your investment. We align Dynamics 365 accurately with your business processes by allowing our team to become an extension of yours and providing you with the knowledge and expertise you need.

## Successful Implementations

A successful implementation allows your organisation to quickly realise the potential of Dynamics 365 and position it as a critical asset in your organisation. Adopting Dynamics 365 may seem like a straight-forward plan, but it can get complex as we tailor the system to your unique business requirements. Therefore, it is important to position the right resources in place in order to plan and execute a successful implementation.

By utilising our deployment service, you speed up seeing the return on your investment, optimise your operations and maximise your efficiency. Our Dynamics 365 deployment packages focus on the plan, design, and implementation phases of your Dynamics 365 Business Solution.

## Access our CRM Experts when needed

Businesses find our Deployment Services extremely beneficial because they are able to access the expertise of our CRM teams. Our experts help guide your use of Dynamics 365 as your business evolves. We take the time to understand your unique business needs and work with qualified experts to tailor your CRM system to your needs. Your dedicated consultant is also backed by a world-class team of CRM experts who can help should the need arise.

## KEY BENEFITS

### PREDICTABLE COSTS

For a predictable monthly subscription, you'll get inclusive, personalized support. You'll know all costs up front so you can budget without any surprises.

### IMPROVED EFFICIENCY

Having this access eliminates the need for you to hire your own CRM administrator internally. This saves time and costs and improves your efficiency without the need of having to worry about HR, training and turnover.

### STRATEGIC PLANNING

We bring to you knowledge of how technology is transforming your industry. We believe that this is critical to your success and we work with you on developing a long-term strategic plan to stay ahead.

### SUCCESSFUL ADOPTION

Our consultants are also trained to gain skills in managing organisational change. This means, we take technology adoption strategies personally and we love talking about change management.

### STRUCTURED ANALYSIS

How often do you find yourself asking if your business process even makes sense? – our structured approach to business process analysis means you can now benchmark yourself against other businesses.
